

How to Stream eAudio with OneClickdigital

All eAudio titles can be streamed from your library's OneClickdigital website without having to download the titles.* This means that you can check out a title and listen to it on any computer, tablet, or smartphone with a Web browser and Internet connection.

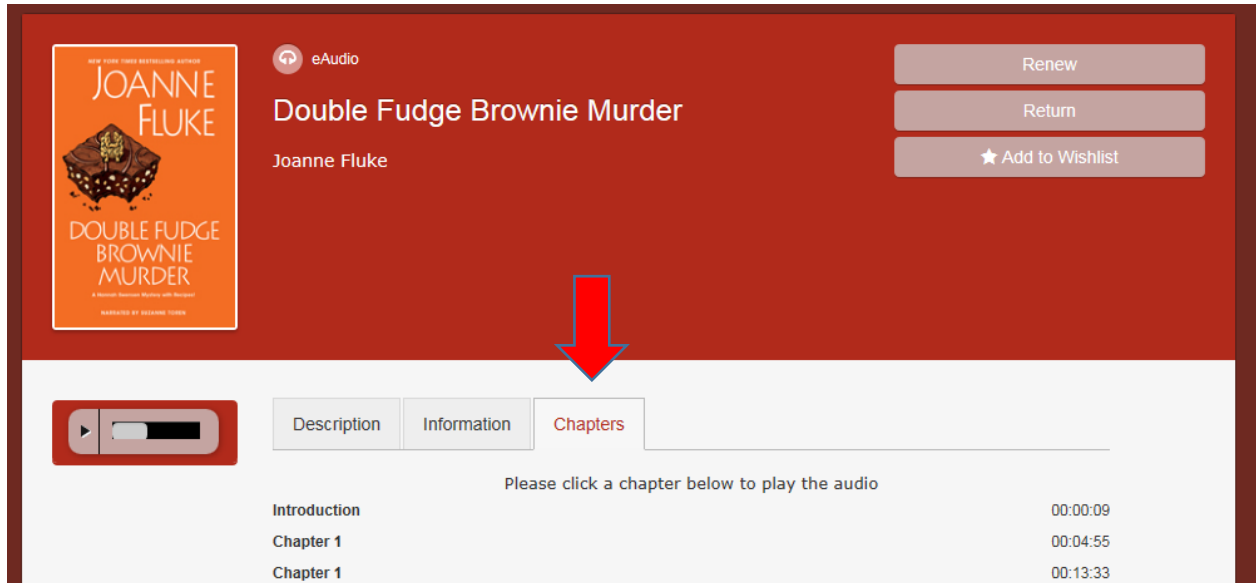

*It is not recommended that you stream audiobooks using your cellular data plan.

- Go to your library's OneClickdigital website and sign in to your account.
- Choose an eAudio title and click on the image or name of the title. You will be brought to the title's detail page.
- Select a period of time for your checkout and click **Checkout Now**.

- After checking out the title, you will be prompted to **Open/Save/Cancel**. If you plan to stream the eAudio, click **Cancel**.

- On the title's detail page, click the **Chapters** tab.

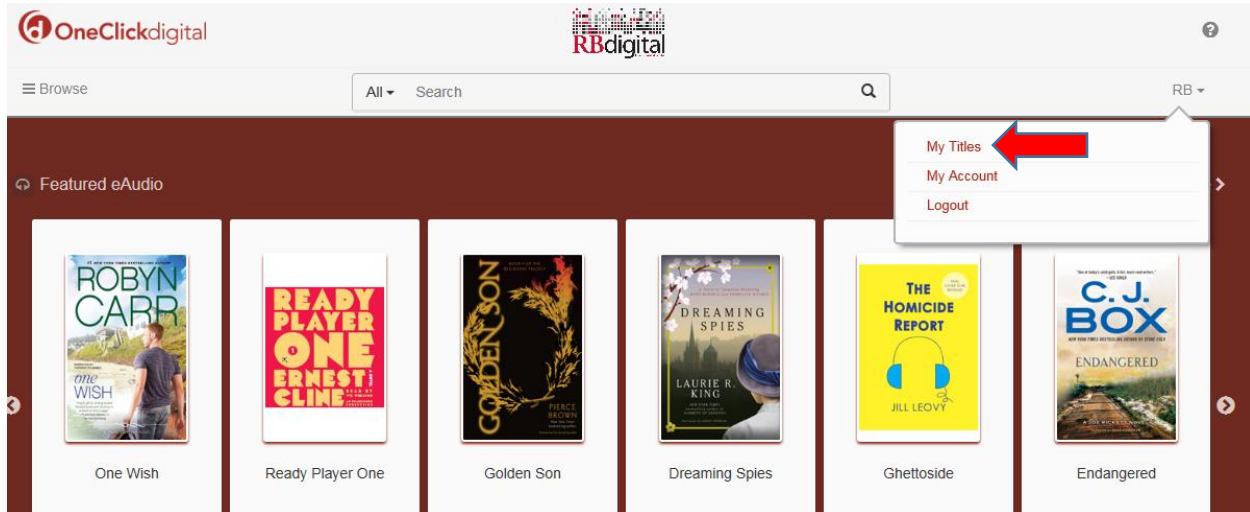

- Click on the introduction or first chapter to start at the beginning of the book, or click on the chapter where you would like to start listening.
- Once the chapter is complete, playback will continue automatically, so there is no need to click on subsequent chapters.
- To pause playback, click on the pause button. The equalizer image shows which chapter is currently playing.

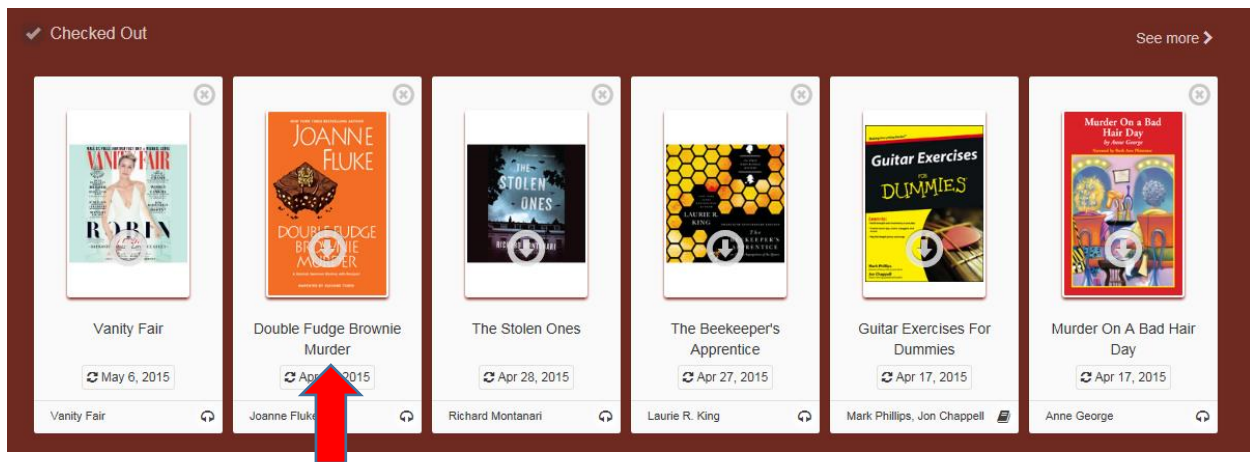

Returning to OneClickdigital to continue streaming playback

- Please note that if you close your Web browser, you will lose your place (bookmarking is not currently available).
- To resume streaming a title after leaving the OneClickdigital site, sign in to your account and go to **My Titles**.

- Click on the name of the title (the text, not the cover) to bring you back to the title's detail page and allow you to continue streaming the eAudio title.

If you experience any issues with the OneClickdigital service, please do not hesitate to contact support@OneClickdigital.com.
